## LEA Conditions:

This Transfer Station shall be operated in compliance with State Minimum Standards for Solid Waste Handling and Disposal.

This Transfer Station shall be operated in compliance with all federal, state, and local requirements and enactments.

The operator shall notify the LEA in writing at least 120 days in advance of any proposed significant change in design or operation of the Transfer Station.

The Report of Facility Information must be amended whenever deemed necessary by the LEA to reflect operating conditions.

Through this permit the LEA may prohibit or condition the handling or disposal of any solid wastes to protect the public health and safety, and the environment. The LEA may suspend or modify waste receiving operations when deemed necessary due to health hazard or public nuisance.

Salvage of materials for recycling shall be conducted by site personnel only.

Recyclable materials stockpiled shall be stored in a manner so as to prevent nuisances, vector harborage, odors, or offsite migration of litter.

Stored recyclable items must be removed whenever deemed necessary by the LEA to prevent health risk, vectors, or disruption of normal site operations.

In no case shall the operator store more than 500 used tires onsite at any one time. The tires shall be properly stored to prevent vector harborage and ponding of water.

The attendant shall visually inspect all incoming loads to prevent disposal of hazardous materials.

The operator shall maintain accurate daily volume records.

The operator shall maintain a log of special occurrences such as accidents, injuries, fires, excessive odor, attempted dumping of hazardous waste or property damage.

All site records shall be available for inspection upon request of any regulating authority.
